LEVEE IMPROVEMENT WORK SET TO BEGIN; WILL SOON BRING LOWER FLOOD RISK

The U.S. Army Corps of Engineers, in partnership with the California Central Valley Flood Protection Board, California Department of Water Resources, and the Sacramento Area Flood Control Agency, will be constructing levee improvements along the Sacramento River East Levee from downtown Sacramento to Freeport. This work is part of the American River Watershed Common Features project authorized by Congress in 2016.

What to Expect

Levee Construction (Spring-Winter 2020) Beginning as soon as mid-March.

Approximately three miles of levee improvements to include degrading up to half of the levee, four seepage cutoff walls ranging in depth from approximately 50 feet to 135 feet deep, and two berms totaling about 1,000 feet in length.

Recreational Impacts

Temporary closure of the Sacramento River bike trail in Pocket area and north of Sutterville Road will require alternative bike routes.

Garcia Bend Park boat ramp/launch area and boat trailer parking area will be closed. Park will remain open throughout construction.

Miller Park marina will likely be impacted for approximately one month after Labor Day.
