## City begins 2012 road resurfacing work

The City of Sacramento Department of Transportation is starting road resurfacing work throughout the City to keep the pavement as close as possible to its newly constructed condition. There may be minor traffic delays and inconvenience, however, when completed the streets will be in nearly new condition.

The department aims to resurface every street in the City about once every ten years to maintain the quality of City streets in a cost effective manner with available funds.

This month, work is starting on portions of Del Paso Boulevard, Riverside Boulevard, Land Park Drive and Bell Avenue. **Check to see if your street is going to be resurfaced and when, via a tentative schedule that is posted weekly [here](#).**

In the following months, the work will move to seventeen arterial streets throughout the city as well as numerous streets in three neighborhoods. All streets scheduled for resurfacing are identified in the [map](#), and are part of this year's \$5 million maintenance program.

Streets will receive one of six types of resurfacing (slurry, micro surface, asphalt rubber cape seal, bonded wearing course, asphalt concrete overlay or rubberized asphalt concrete overlay) depending upon the street condition.

## What residents can expect:

Work is expected to take place weekdays only, 8:30 a.m. to 4 p.m., with the exception of the Central City streets, where work will also take place on weekends. Residents will be notified via a reminder that will be hung on the door three to five days before the street is due to be resurfaced. The door hanger will specify the day work is to be done. Note, before and after the actual resurfacing, work crews may be seen performing other work on the street. Most commonly, no vehicles will be allowed on the street during the resurfacing process and the street will be closed for a portion of the day.

For questions about this year's road resurfacing projects, contact us via 311 or call the Help Desk at 808-7027.
