

Roseville Road Bridge Replacement Project

City of
SACRAMENTO
Department of Public Works

Construction of Roseville Road Bridge Replacement Project Complete *Roseville Road over Arcade Creek to reopen to thru traffic on December 22*

The City of Sacramento Department of Public Works is excited to announce that the Roseville Road Bridge Replacement Project has been completed. Beginning Tuesday, December 22, Roseville Road over Arcade Creek will reopen to all thru traffic.

In May 2015, construction began to remove and replace the existing Roseville Road Bridge over Arcade Creek. A portion of Roseville Road (approximately one half mile north of Connie Way and Roseville Road) was closed for the replacement. The project was completed on time and within budget with a total project cost of \$7.4 million, funded through the Highway Bridge Program.

The new bridge now meets current standards and improves:

- Safety for pedestrians and bicyclists with wider bike lanes/sidewalks
- Hydraulics of Arcade Creek

Thank You!

We understand the impact the temporary road closure caused for both local and regional traffic. We appreciate your patience during this important infrastructure improvement project. Thank you for partnering with the City to alter your travel during construction of the new bridge.
