

sebastian

Very long rifle  
On the trip to the center  
for sacramento history I  
looked at lots of artifacts,  
but the one that caught  
my eye was the very  
long rifle. I chose this  
artifact because I thought  
it was interesting how it  
was made. It was made  
from mostly wood with  
some metal to hold the  
barrel together. The rifle  
is not like the guns  
we have today because  
the modern guns are

heavier, stronger, and made  
of metal, but the guns  
can do the same  
job of shooting.
