<b>ALKALI FLAT CENTRAL</b>				
<b>Approved</b>				
	PB09-057	1117 F ST	David Hung 916-808-5530	Staff
	Approved: 10/15/2009	<p>The Preservation Office received a request to review a window replacement project at 1117 F Street. This building is both a landmark and contributing resource within the Alkali Flat Central Historic District. While the home was originally built with Folk Victorian details, the rear elevation suffered severe fire damage in the 1970s and was thereafter rebuilt without adhering to the Secretary of the Interior Standards for Rehabilitation of Historic Buildings.</p> <p>The applicant has proposed removal and replacement of an existing garden window on this newer rear elevation. The new window will maintain the same type and dimensions as the window being removed, however, instead of wood the applicant proposes to install a new metal clad window to prevent future deterioration. While this is not a typical preservation practice, the window is not original and reflects the non-historic 1970s remodel after the fire in this area.</p>
