

Application for Reduced Residential Development Impact Fee Rates for Affordable Dwelling Units

Please note: Each building permit application requires this form CDD-0410 to be filled out separately.

Approval of this fee reduction is subject to verification by the City and the availability of funds. Eligibility is restricted to projects which can demonstrate that they will meet at least one of the definitions of affordable units shown below. If approved, the fee reduction will be applied proportionately according to the number of affordable dwelling units in the project that are demonstrated to be affordable dwelling units.

Rental units: To be eligible for this fee reduction, an “affordable dwelling unit” means a dwelling unit or facility (1) to be occupied by low- or moderate-income households as defined in section 50093 of the California Health and Safety Code, and (2) offered at an affordable rent as defined in section 50053 of the California Health and Safety Code for a period of at least 30 years. The “affordable dwelling unit” shall be either: Subject to restriction for a period of at least 30 years under a recorded regulatory agreement between the property owner and the City, the Sacramento Housing and Redevelopment Agency, or another local, state or federal agency; or for projects that do not otherwise require a regulatory agreement, the applicant must demonstrate to the satisfaction of the Planning Director in the Director’s sole discretion that the principles of (1) and (2) of this section B are met.

For sale units: To be eligible for this fee reduction, an “affordable dwelling unit” for a for-sale unit means (1) a unit sold at an affordable housing price as defined in section 17.712.020 of Sacramento City Code, and (2) to be occupied by low-income households as defined in section 50079.5 of the California Health and Safety Code for a period of at least 30 years.
