Owner Certification of Residential Lot Lines, Building Location, and Required Setbacks

Release and Indemnity

A property owner proposing construction for which a building permit is issued by the City of Sacramento is required to verify for the City and the City's building inspectors the location of the property lines at the construction site and the applicable required setbacks for the improvement to be constructed.

The certification and release and indemnity are required when the required building setback is five feet or less and a survey is not provided. This form must be completed, signed, and submitted to the City's building inspector prior to the first foundation inspection.

The Building Official is authorized to require additional construction documents that are prepared by a registered design professional. This may include evidence of property line location (including a property survey) whenever the Building Official determines that the location of the proposed work is in question or is disputed. 2016 CRC, Section R106.

Certification of Lot Lines, Building Location and Required Setback
