CDD	The City continues to monitor the status of flood protection improvements in the Natomas Basin. The Housing Element sites inventory contains capacity for over 4,000 units of lower income housing and over 2,500 of moderate-income housing in vacant and underutilized sites and approved projects in this area of the City. Per the City’s Floodplain Management Regulations (15.104.065 Zone A99 regulations), for the calendar year 2023, the allowed number of permits to be issued for single unit dwellings is 3,734, and the allowed number of permits to be issued for multi-unit dwellings is 2,879. These caps are well in excess of the amount of recent development activity and projected development activity for the calendar year 2023. Thus, the cap on residential building permits will not affect the City’s ability to meet the lower income RHNA.
