<b>Description:</b> BUILDING RELEASE LETTER		
electrical and mechanical. We will be removing sections of an existing conveyor system (electrical/mechanical components) and installing a new layout. This new layout will be completed by reusing some of the existing conveyor and adding some new equipment. All of the conveyor will be mounted on the floor of the building. The entire work area will be less than 15,000 sq. ft. of warehouse space. We will also be installing the electrical components used to power and control the conveyor. I think we plan on drawing power from an existing supply, but I'm not 100% on that because I only handled the mechanical scope of this project.

<b>Location:</b>	<b># Units:</b> 0	<b>Sq Ft:</b>
<b>Description:</b> EXPEDITED - EPC - The proposed project by Mercy Housing envisions converting the Capitol Park Hotel into program-enriched low-income housing for individuals transitioning out of homelessness, many of whom are expected to be seniors, handicapped, or have special needs. Due to the unique programmatic needs of the proposed new use, alterations that improve the building's functionality for its expected new clientele are at the forefront of the rehabilitation project design. At the interior, these include seismic retrofitting; reconfiguration of residential units and circulation paths to meet code requirements; creation of specific programmatic spaces, such as residential common areas, multi-purpose rooms, and offices for building management staff; preparation of the ground-floor retail units as unfinished shell space for future tenant improvements; and use of durable, low-cost materials and finishes. Exterior alterations include the removal of one fire escape from the west facade, reconstruction of an altered storefront at 1129 9th Street (Retail #4), replacement of exterior doors at 1117 9th Street (Retail #1) and the back door of 1131 9th (Retail #5), infill of few select window openings at secondary facades, and replacement of a non-historic service enclosure and air shaft at the east facade. The programmatic requirements and budgetary limitations of the project result in a modest scope of rehabilitation work to historic features and minimal restoration of ground-floor commercial storefronts and second-floor mezzanine windows. - PLNG-INSP

<b>Description:</b> EXPEDITED - EPC - Suite 100, This is a demolition of all interior walls, ceiling, and floor finishes in Suite 100. There will also be installation of new suspended t-grid ceiling and soffit at exterior wall, with associated Mechanical and Electrical work. This project is basically a "reverse" TI. We are taking down all the walls and ceiling in this suite, and it will be back to "Shell" condition - - just Fire Sprinklers and lighting will remain. It will be left like this for the future tenant. We did not upload the Accessibility Upgrade Form to this project, because it is unclear to us who would be responsible for the ADA upgrades. It seems that this would fall under the responsibility of the future tenant.
