<b>Description:</b> EPC - introduce a new lateral system to the existing 145,975 sf, 4-story building. the new lateral force resisting system consists of a combination of concrete shear walls and a concentric steel brace frame in each direction. the new lateral system is designed to resist 100% of the design seismic loads for the entire structure.		
The proposed retrofit works are in preparation for two additional levels being added to the top of the existing building. The upper portion addition will be laterally braced by a 2-way steel moment frame system. The two story addition will be performed under a separate permit. THE DEMO PERMIT IS COM-2011015
