Description: Addition Whole House Fan to Attic. A whole house fan with a maximum airflow per HVI-916 of at least 3000 cfm but no more than 4000 cfm shall be added to the attic with the intake located centrally in the hallway of the house. House has a total of 23 soffit vents (approx. 22x4in each) and four gable vents (approx. 1sqft each). Total net free attic venting is estimated at 9sqft (50%). A unit will be installed in a new location. This unit will be fully screened behind a solid fence or alternatively behind shrubs or buildings providing screening resulting in the unit not being visible from any street views. Roof top installations will be located on back roof slopes and below ridge lines, and not visible from street views.
