Description: BUILDING RELEASE LETTER electrical and mechanical. We will be removing sections of an existing conveyor system (electrical/mechanical components) and installing a new layout. This new layout will be completed by reusing some of the existing conveyor and adding some new equipment. All of the conveyor will be mounted on the floor of the building. The entire work area will be less than 15,000 sq. ft. of warehouse space. We will also be installing the electrical components used to power and control the conveyor. I think we plan on drawing power from an existing supply, but I'm not 100% on that because I only handled the mechanical scope of this project.
