Fitch Rates Sacramento, CA Water Revs 'AA-'; Outlook Stable

Fitch Ratings - San Francisco - 26 March 2020:

Fitch Ratings has assigned a 'AA-' rating to the following obligations issued by Sacramento, CA:

--$187.1 million water revenue refunding bonds, series 2020 (federally taxable).

The bond proceeds will be used to refund a portion of the city's outstanding water revenue bonds, series 2013 (approximately $166.4 million of the $191.8 million outstanding). The bonds are expected to sell via negotiation on or around April 27, 2020.

In addition, Fitch has affirmed the 'AA-' ratings on the following outstanding obligations:

--Approximately $242.8 million water revenue bonds, series 2013 (pre-refunding) and 2017.

The Rating Outlook is Stable.

SECURITY

The bonds are secured by a senior lien on the city's net water system revenues after payment of maintenance and operations expenses.

KEY RATING DRIVERS

SOLID FINANCIAL PERFORMANCE: Financial performance is solid with very stable revenues, strong debt service coverage (DSC) and healthy liquidity. Margins are expected to narrow over the next few years given recent borrowing and anticipated flat rates but remain adequate for the rating category.

HIGH DEBT, CAPITAL NEEDS: The debt burden is above average and expected to remain so over the next five years with the completion of a major water metering project.

DISCIPLINED RATE POLICY: The city council previously approved significant rate increases to support planned capital investments and rising debt service. Rates are equal to Fitch's 1% of median household income affordability metric, but are expected to remain flat through at least the forecast period.

STRONG SUPPLY POSITION: The city has rights to an ample supply of local surface water under high-priority water rights. It conserved heavily in the recent drought and aims to maintain a lower level of usage going forward.

LARGE, DIVERSE SERVICE AREA: The utility is the monopoly provider of essential retail water services to a large urban service area. The customer base is diverse and largely residential.
RATING SENSITIVITIES

Developments that May, Individually or Collectively, Lead to a Positive Rating Action:

--A material decline in leverage metrics, which is not expected over the intermediate term, could lead to positive rating action.

Developments that May, Individually or Collectively, Lead to a Negative Rating Action:

--Additional borrowing due to revisions in the capital plan or reductions in operating cash flow significantly beyond that already anticipated would be viewed unfavorably given the already high leverage the utility.

CREDIT PROFILE

The utility provides essential water services to more than 500,000 residents of the city, California's state capital and the nation's 36th-largest city. The utility also serves several small wholesale accounts. The customer base of 142,831 accounts is largely residential, and the utility's three largest customers are governmental entities. The 10 largest retail accounts provide just 7.7% of operating revenues.

The Sacramento economy is growing at a healthy pace with payroll employment growth outpacing the nation over the past several years and unemployment continuing to decline. The unemployment rate trends somewhat higher than the national average, though it was 3.2% in December 2019 compared with 3.4% for the nation. The State of California is the dominant local economic force and employer. While the state provides a solid fundamental base for local economic activity, the concentration of state employment in the city leaves Sacramento heavily exposed to changes in the state's budget position and employment levels.

The recent outbreak of coronavirus and related government containment measures worldwide creates an uncertain global environment for the Water and Sewer sector. While the utility's performance through most recently available data has not have indicated impairment, material changes in revenue and cost profile are occurring across the sector and likely to worsen in the coming weeks and months as economic activity suffers and government restrictions are maintained or expanded. Fitch's ratings are forward-looking in nature, and Fitch will monitor developments in the sector as a result of the virus outbreak as it relates to severity and duration, and incorporate revised expectations for future performance and assessment of key risks.

SOLID FINANCIAL PERFORMANCE

Financial performance remained solid through a period of intense drought due to ongoing adjustments in water rates and substantial amount of revenues provided by fixed meter fees. Fitch-calculated senior DSC (net of transfers out of utility taxes equal to 11% of utility rate fees paid to the city's general fund) averaged 3.5x over the last five years, providing solid coverage for the rated bonds. All-in DSC net of transfers was solid at a five-year average of 2.0x. The utility tax transfer approved by voters and levied on the city's water, wastewater, storm-drainage and solid-waste enterprises may be higher or lower than 11% on one or more of the enterprises provided that the total tax paid by all of the enterprises does not exceed 11% of the total gross revenues received from user fees and charges of all of the enterprises combined. The city currently levies 11% on each of the enterprises. Free cash to depreciation has increased each of the last four years to a healthy 175% in fiscal 2019, providing solid excess revenues for investment in the system after payment of debt service and operating expenses.
Liquidity is strong, with a five-year average days cash on hand at 740. Unrestricted cash and investments equaled $107.4 million, or 639 days cash, as of June 30, 2019. Cash increased rapidly in recent years as the city ramped up rates to support its capital investment program.

Financial performance is expected to moderate somewhat over the next five years as the utility’s debt obligations increase and rates remain flat. Fitch-calculated all-in DSC based on city forecasts will fall to a more moderate 1.6x by fiscal 2024, or 1.25x net of transfers. Fitch-calculated senior coverage is expected to remain strong for the rating category, declining to 2.3x in fiscal 2024, or 1.8x net of transfers.

STRONG RATE DISCIPLINE; NO ADDITIONAL INCREASES

The Sacramento City Council has shown strong rate discipline in recent years, increasing rates 10% each year from fiscal 2013 to 2020 (except 2016) to support a significant increase in capital spending. Water rates for 100 cubic feet of water cost $50.31 per month in fiscal 2020, which equal Fitch's 1% of median household income affordability threshold. Rates are expected to remain flat at least through the five-year forecast period. As such, rates are expected to moderate somewhat. The utility has faced some rate controversy in the past, but has received strong political and electoral support for its need to raise rates to update its aging infrastructure.

HIGH DEBT, CAPITAL NEEDS

The utility's current capital improvement plan (CIP) for fiscal 2020-2024 totaling $138.2 million is well under the $276.5 million 2017-2021 CIP. The utility entered into a $173.1 million SRF loan in fiscal 2018 to fund a statutorily mandated plan to meter its large customer base (a $230 million project that is expected to be completed by 2021, about three years ahead of the requirement). The city also continues to work on main replacements and other asset renewal to address a backlog of deferred necessary maintenance on the system’s aging infrastructure.

Debt per customer is approximately $3,740 and debt per capita is just over $1,000 including the SRF loan, both about 2x the median for 'AA' rated water and sewer utilities. While the utility does not expect any additional borrowing in the intermediate term, the high reliance on debt and the high debt burden are the main factors precluding a higher rating in the near term.

STRONG WATER RIGHTS

The utility maintains a large supply of low cost, local surface water that is limited in only the most severe California droughts. Sacramento draws about 76% of its water supplies from the American and Sacramento Rivers based on a five-year average. Another 24% of supplies are provided by local ground water wells. The city estimates that its reliable supplies equal about 280 million gallons per day (MGD) compared with recent demand of less than 100 MGD. The city has contracts with the U.S. Bureau of Reclamation that require the agency to provide sufficient flows to meet city needs before serving the Bureau's own Central Valley Project customers from its Folsom Lake reservoir.

Despite its high priority rights, Sacramento cut use quite aggressively in the recent drought ending in 2017, even before state-mandated conservation measures were put in place. Once state regulation was imposed, the city maintained compliance with a very high conservation requirement of 28%.

Policymakers expect conservation to continue with its metering program and public outreach aimed at hardening demand at lower levels.

Reducing water usage allows the city to create greater drought resiliency and to accommodate new growth without investing in expensive new supply projects. The reductions would also reduce political and regulatory risk that could stem from above average water use in a state where water policymakers are pushing to reduce usage. Reductions in the volume of water sold are not a credit concern so long as the city continues to take offsetting rate action to recover the full cost of providing service.
ESG Considerations

ESG issues are credit neutral or have only a minimal credit impact on the entity(ies), either due to their nature or the way in which they are being managed by the entity(ies). For more information on Fitch's ESG Relevance Scores, visit www.fitchratings.com/esg.

Applicable Criteria

U.S. Water and Sewer Rating Criteria (pub. 29 Nov 2018)
Public Sector, Revenue-Supported Entities Rating Criteria (pub. 07 Nov 2019)
other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US$1,000 to US$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular insurer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US$10,000 to US$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see https://www.fitchratings.com/site/regulatory), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.

SOLICITATION STATUS

The ratings above were solicited and assigned or maintained at the request of the rated entity/issuer or a related third party. Any exceptions follow below.

Endorsement Policy
Fitch's approach to ratings endorsement so that ratings produced outside the EU may be used by regulated entities within the EU for regulatory purposes, pursuant to the terms of the EU Regulation with respect to credit rating agencies, can be found on the EU Regulatory Disclosures page. The endorsement status of all International ratings is provided within the entity summary page for each rated entity and in the transaction detail pages for all structured finance transactions on the Fitch website. These disclosures are updated on a daily basis.
