Residents of Sacramento can also recycle their oil at home. Simply call (916) 384-5511 or 211 24 hours before your scheduled recycling day for your pickup appointment. Help keep Sacramento clean by putting waste in its place! Most centers take up to 5 gallons at a time.

**OIL RECYCLING FACILITIES**

The California Integrated Waste Management Board encourages the recycling of used motor oil by certifying used oil recycling collection centers throughout the state. You can drop off your used oil from the public and pay you 40¢ a gallon. Most centers take 5 or 10 gallons at a time.

Sacramento has two Household Hazardous Waste Facilities. The Sacramento Recycling and Transfer Station is located at 8001 Foothills Boulevard. The Sacramento County North Area Recovery Station is located at 4320 Roselle Street. To find the hazardous waste disposal facility nearest you, please visit csa.ca.gov or call 1-800-925-8847.

**Bilge Care & Preventing Oil Spills Tips**

1. Never use solvents or degreasers to clean oil or fuel - it is illegal and increases the pollution problem.
2. Install a closed bilge system with checks that filter out fuel, oil, and other contaminants from the bilge discharge.
3. Use oil-only-absorbing pads in the bilge, securely fastened to prevent clogging the bilge pump or its system, to capture unfiltered fuel and oil.
4. If you have a large quantity of oil in the bilge, use a bilge pump system. Never use snaps to barge for the bilge.
5. If the bilge and/or engine compartment still needs significant cleaning after oil bilge pumpout, use a steam cleaning service.

**Free Bilge Oil Kits**

Write us a letter and build up the engine bilge in small quantities. Help prevent pollutants from entering the water by using a bilge kit. A bilge kit contains an absorbent pad or sheet to be placed in the boat's bilge and soak up oil before the bilge pump discharge it into the water. Folsom Lake Marine has free absorbent pads or sheets. Check out our free collection sites for used pads or sheets. Pick up your free absorbent today!

**Guide to MARINA Services**

- See map on rear side for locations

**Hazardous Waste**

1. Never use solvents or degreasers to clean oil or fuel. Solvents can cause the volatile organic compounds to disperse in the air. Adding soap is illegal and bad for the environment.
2. Many cleaning and maintenance products are considered hazardous waste such as cleaners, fast and batteries, used oil and filters, oil-based saturated absorbers, solvents, paints, oils, varnishes, and cleaning products.
3. Review storage of products every six months and properly dispose of oil or hazardous products. Be sure to bring all hazardous waste to your local Household Hazardous Waste Facility. HHW facilities and used oil recycling centers are listed on the map.
4. Practice preventive maintenance and inspect fuel lines, hoses, hydraulic lines, valves, oil seals, gaskets and connections for leaks and deterioration.
5. Pick up your free absorbent today!

**WHAT ELSE CAN I DO TO HELP KEEP OUR WATERS CLEAN?**

1. Let park or marina staff know if pumpouts or motor fuel service are needed.
2. When boating or camping at Folsom Lake, use the pumpouts located near the restrooms at Folsom Marina to move out portable toilets.
3. Make sure babies and toddlers wear waterproof diapers when using the Folsom Lake Marina for children's bathing area.
4. When recreating with your pet, make sure to pick up after them. Some area dog waste stations can be found on the map.
5. Get a free bilge kit from the Folsom Lake Marina to help eliminate oil discharge in our rivers.
6. Properly dispose of any harmful chemicals used on your boat.
7. Put waste in its place! Recycle what you can and use trash cans to dispose of non-recyclable garbage.
8. Encourage other boaters to follow these practices.

**Water - we love it. It is a vital source of life for us and for the world around us. Use this map to help navigate your waterways and local communities and follow the guidelines included to help keep Our Waters Clean!**
