*4" and larger water service connections - Contractor excavates and exposes water main for City to install tap and gate valve. Contractor installs water service connection from main line to the point of service, backfills trench and restores pavement. Incidental work such as encroachment permit & traffic control is the Contractor’s responsibility.

2” and smaller water service connections - Contractor excavates and exposes water main for City to install a tap, corporation stop, water pipe from main to point of service and meter box. Contractor backfills trench and restores pavement. Incidental work such as encroachment permit & traffic control is the Contractor’s responsibility.

*1” to 2” Meters: City removes idler, provides and installs meter.

Meters 3” and Larger: City provides meter to contractor for installation.
