

How to make an indoor basketball hoop

Materials needed:

- A large piece of cardboard
- A wire hanger
- Duct tape
- Markers
- Scissors
- String

Activity Instructions:

Start out by bending the wire hanger into a circle. Hold the hook end of the hanger, then slowly bend at a 90 degree angle downward.

Begin cutting the cardboard into a back board. Decorate the back ground. Attach the hook to the lower back side of the backboard. Use the duct tape to tape the hoop to the backboard. For the net, be creative with the strings and create a net.

Hang the completed basket to a wall or door.
