

# EGG BOUNCE

## Science Experiment

### Items Needed:

- raw egg
- Cup
- Vinegar

### Directions:

1. Get a raw egg and carefully place it into a glass or jar.
2. Fill the glass with white vinegar until the egg is completely submerged.
3. Leave the egg in the glass for 1-3 days. ...
4. Remove the egg from the glass and rinse it under some tap water.
5. Examine the egg. You will notice that it feels rubbery (like a bouncy ball). Then lift the egg 1-2 inches in the air, let go, and watch it bounce.
6. When you are ready for some messy fun, lift the egg a little higher in the air and let it go...SPLAT!
