Mindfulness is experiencing life from moment to moment with full awareness and acceptance. The practice of mindfulness teaches us to pay greater attention to our internal and external experiences leading to a more balanced and harmonious existence. Through guided meditation this workshop will explore how we can cope with the daily stresses that we encounter.

Mental Illness: It's not what you think #StopStigma

Sacramento County has been working on a campaign to spread awareness on the subject of stigma with mental health and the barriers that discourages individuals to access mental health resources. Their goal is to fundamentally change negative attitudes and perceptions about mental illness and demonstrate that people living with mental illness are everyday people leading meaningful lives. This workshop will have a guest speaker who is currently living with mental health issues and will discuss openly about what that is like for them.
