ENTERING YOUR LICENSE PLATE

Parking Services is using new technology to confirm payment of your parking session, based on your license plate. Accurate entry of your plate is important so you don't get a citation.

- If you have no license plate, enter the last four digits of your VIN, located at the base of your front windshield. Your VIN must be unobstructed when parking.

- If you have a license plate with stacked letters or special symbols, enter only the "full size" numbers and letters. Special symbols should not be entered.

- Do not enter any spaces. "MY CAR" should be entered as "MYCAR"
