City of
SACRAMENTO

Fruitridge Road Improvements Project

The City of Sacramento is improving safety for those walking, biking, taking transit, and driving, as well as improving connectivity for walking and biking with the Fruitridge Road Improvements Project. The project is located on Fruitridge Road between 65th Street and Power Inn Road and aims to safely accommodate all modes of travel through pavement rehabilitation, continuous bike lanes, reconstructing curb ramps, upgrading signal equipment, and other improvements. Join us for a Community Workshop to learn about the new improvements and upcoming construction schedule.
