## Project Overview

### PROJECT DESCRIPTION

The Acacia Avenue Safe Routes to School Project, which is located between Rio Linda Boulevard and Altos Avenue, will provide a connection between local schools and the neighborhoods east of Rio Linda Boulevard. The project site is also adjacent to the existing Sacramento Northern Bike Trail, which many students use as a route to school. The project will construct a new sidewalk along the north side of Acacia Avenue, and a new traffic signal on Rio Linda Boulevard.

### DETOURS:

**Eastbound traffic:** South on Altos Avenue. Left on Eleanor Avenue.

**Westbound traffic:** South on Rio Linda. Right on Eleanor Avenue. Right on Altos Avenue.

### BENEFITS

This project will improve pedestrian safety near Martin Luther King Jr. Technology Academy, Harmon Johnson Elementary School, and Noralto Elementary School by constructing pedestrian improvements and installing a new traffic signal and crosswalks at the Acacia Avenue/Rio Linda Boulevard intersection.

### COSTS AND FUNDING

The estimated total project cost is \$900,000. The project is funded through the Measure A and State Safe Routes to School Program funds.

### SCHEDULE

Award of construction contract is scheduled for July 2015, and project completion for September 2016.
